for IGOSS

for MARPOLMON

for ADCP

JAPAN OCEANOGRAPHIC DATA CENTER

Hydrographic Department
Maritime Safety Agency
5-3-1, Tsukiji, Chuo-ku, TOKYO, 104-0045 JAPAN

PREFACE

The Japan Oceanographic Data Center (JODC) was established in the Hydrographic Department, Maritime Safety Agency of Japan in 1965 in accordance with the resolution adopted by the Intergovernmental Oceanographic Commission (IOC) of UNESCO in 1961.

Since its establishment, JODC has been fulfilling the role of the synthetic marine data bank of Japan, and has been carrying out internationally its services as the National Oceanographic Data Center under the system of International Oceanographic Data and Information Exchange (IODE) and also in charge of the Responsible National Oceanographic Data Center (RNODC) for WESTPAC, IGOSS, MARPOLMON and ADCP.

This annual publication, "RNODC Activity Report" is to inform of the activities of JODC as the aforementioned RNODCs to data contributors, data users, oceanographic community and other national oceanographic data centers within the framework of IODE.

I would like to take this opportunity to express my sincere appreciation for the continuing support given by Institutes and Centers of the IODE System through their sending of data.

March, 1998

Toshio NAGAI
Director
Japan Oceanographic Data Center
5-3-1 Tsukiji, Chuo-ku
Tokyo 104-0045 Japan

1. Terms of Reference for RNODCs

1.1 RNODC for WESTPAC

Operated by NODC of Japan since 24 February 1979.

- (1) To produce a work plan to define: i) the procedures of JODC in acquiring, processing, reformatting and archiving, distribution of data and inventory of research cruises in the WESTPAC region with reference to the WDC system, and ii) the implementation of this work plan;
- (2) To provide a mechanism for registration of WESTPAC cruises with RNODC - WESTPAC;
- (3) To work closely with National Co-ordinators for IODE and any other national contact points for data management within WESTPAC who might be appointed by Member States;
- (4) To publish a guide for WESTPAC data management for distribution to Member States through national contact points.

1.2 RNODC for IGOSS (BATHY and TESAC)

Operated by NODCs of Japan, the USA and Russia (then, the USSR) since September 1979.

- (1) To acquire BATHY, TESAC data sets and sub-surface temperature data from drifting and moored buoys from IGOSS Specialized Oceanographic Center (SOC) for area of responsibility;
- (2) To apply supplementary quality control to acquired data and provide services to users after 30 days from receipt of that data;
- (3) To archive, and make available to users, selected data products from SOCs and analysis centres;
- (4) To acquire non-operational BATHY, TESAC and sub-surface temperature data from drifting and moored buoys and/or datasets for area of responsibility;
- (5) To apply quality control of non-operational data, prepare integrated datasets and provide services to users;
- (6) To provide for exchange of IGOSS data in GF-3 format with other RNODCs or to other users as requested;
- (7) To maintain a database and inventories for areas of responsibility;
- (8) To prepare products based on operational and non-operational IGOSS data, as appropriate;
- (9) To transmit to the WDCs annually datasets in GF-3 format, inventories and selected data products;
- (10) To prepare summary and BATHY, TESAC and sub-surface temperature from drifting and moored buoys database plots and transmit to the IOC Secretariat every 15 August and 15 February for data received during the previous 6 months;
- (11) To participate in efforts to monitor data flow;
- (12) To participate as feasible in IOC training programmes;

-
- (13) To provide for exchange of documentation and software regarding quality control and processing procedures, with other RNODCs, as possible.

1.3 RNODC for MARPOLMON

Operated by NODCs of Japan, the USA and Russia (then, the USSR) since 3 May 1987.

- (1) To provide a referral capacity to worldwide holdings of marine pollution data.
- (2) To provide copies of processed data to World Data Centres A and B (Oceanography);
- (3) To provide machine listings and simple statistics of marine pollution data;
- (4) To produce graphics of marine pollution data, for the use of concerned Member States;
- (5) To conduct formal or informal training sessions for data centre personnel involved in the programme and for those who actively submit marine pollution data.

1.4 RNODC for ADCP

Operated by NODC of Japan since July 1991.

- (1) To compile and evaluate information on existing data sets held by Member States already active ADCP measurements and produce a catalogue of ADCP users with referral capacity;
- (2) To produce a detailed catalogue of ADCP users that includes information about their ADCP instrumentation, related instrumentation (GPS, Loran, measurement of ship motion, etc.), procedures, averaging/sampling (temporal and spatial vertical and horizontal), quality assurance methods, formats, products and uses of data;
- (3) To establish provisional standards and procedures for the reduction, quality control, archiving, and exchange of ADCP data;
- (4) To assemble a pilot ADCP data archive of samples of ADCP data from other Member States so as to assess the effectiveness of the proposed standards and procedures;
- (5) To prepare guidelines concerning the different performance characteristics and data documentation relevant to each instrument type, in order to formulate adequate data documentation and quality control;
- (6) To report on the progress of RNODC ADCP to the Group of Experts on RNODCs and Climate Data, and to IODE-XIV.

2 Activity of RNODCs

2.1 RNODC-WESTPAC

2.1.1 Activities

Major activities are as follows: --

- (1) The collection and archive of CSR (Cruise Summary Report of IODE, ROSCOPs 3rd edition) and data since the starting of the WESTPAC programme in 1979.
- (2) The annual training course on oceanographic data management carried out from 13 to 24 October 1997 and seven trainees from Korea, Russia and Vietnam were participated.

2.1.2 Data holdings

Data holdings are shown in the following tables and figures: --

- (1) Table 1: The inventory of CSR in 1996.
- (2) Table 2: The numbers of observation station classified according to instruments in each year.
- (3) Fig. 1: The distribution plots of Serial Station Data, CTD and ADCP profiles in 1996.

Fig.1: Serial Station Data, CTD and ADCP Profiles in 1997

2.2 RNODC-IGOSS (Integrated Global Ocean Services System)

2.2.1 Activities

Major activities are as follows: --

(1) The management of the data for specific geographical areas as RNODC with the responsibility since the starting of the IGOSS project in 1977.

(2) The report of the state of data management to IOC and WMO twice a year.

2.2.2 Data holdings

JODC received BATHY/TESAC data for 1997 from JMA (Japan Meteorological Agency), that is one of SOC, and applied quality control procedure for final archiving.

Data holdings are shown in the following tables and figures: --

(1) Table 3: The number of archived data in 1997, which the country names are identified from the call sign. The call sign "SHIP" is assigned to data with no call sign.

(2) Table 4: The number of archived data by country and by year.

(3) Fig 2: The number of data in 10 degrees mesh archived in 1997.

(4) Fig 3: The observation spots for data archived in 1997.

(5) Fig 4: The volume of archived data by year.

(6) Fig 5: The contribution plots of data by country and by year.

Table 3: Number of BATHY/TESAC data archived at JODC in 1997.

2.3 RNODC-MARPOLMON

2.3.1 Activities

Major activities are as follows: --

(1) Collection and management of four types of data, namely oil slick, tar ball, beach tar and hydrocarbon, since 1975.

(2) The received data are digitized and forwarded to WDC in the IODE exchange format.

2.3.2 Data holdings

Data holdings are shown in the following tables and figures: --

(1) Table 5: The number of archived data in 1995 which were provided by JMA (Japan Meteorological Agency) and JMSA (Japan Maritime Safety Agency).

(2) Table 6: Data volume archived according to their types.

(3) Fig. 6: The existence spots for oil slick data.

(4) Fig. 7: The observation spots for tar ball data.

(5) Fig. 8: The observation spots for beach tar data.

(6) Fig. 9: The observation spots for hydrocarbon data.

Table 5: JODC Processed following data submitted JMA and JMSA in 1995.

		JMA	JMSA
Oil Slicks	:	1,221 points	0 points
Tar Ball	:	84 points	231 points
Beach Tar	:	0 points	559 points
Hydrocarbon	:	52 points	0 points

Table 6: JODC holds following data which were provided by WDC-A, JMA and JMSA

Oil Slicks	:	115,616 points	(1974-1994)
Tar Ball	:	12,070 points	(1973-1995)
Beach Tar	:	13,044 points	(1975-1995)
Hydrocarbon	:	5,441 points	(1974-1994)

Fig. 6: The existence spots for oil slick data

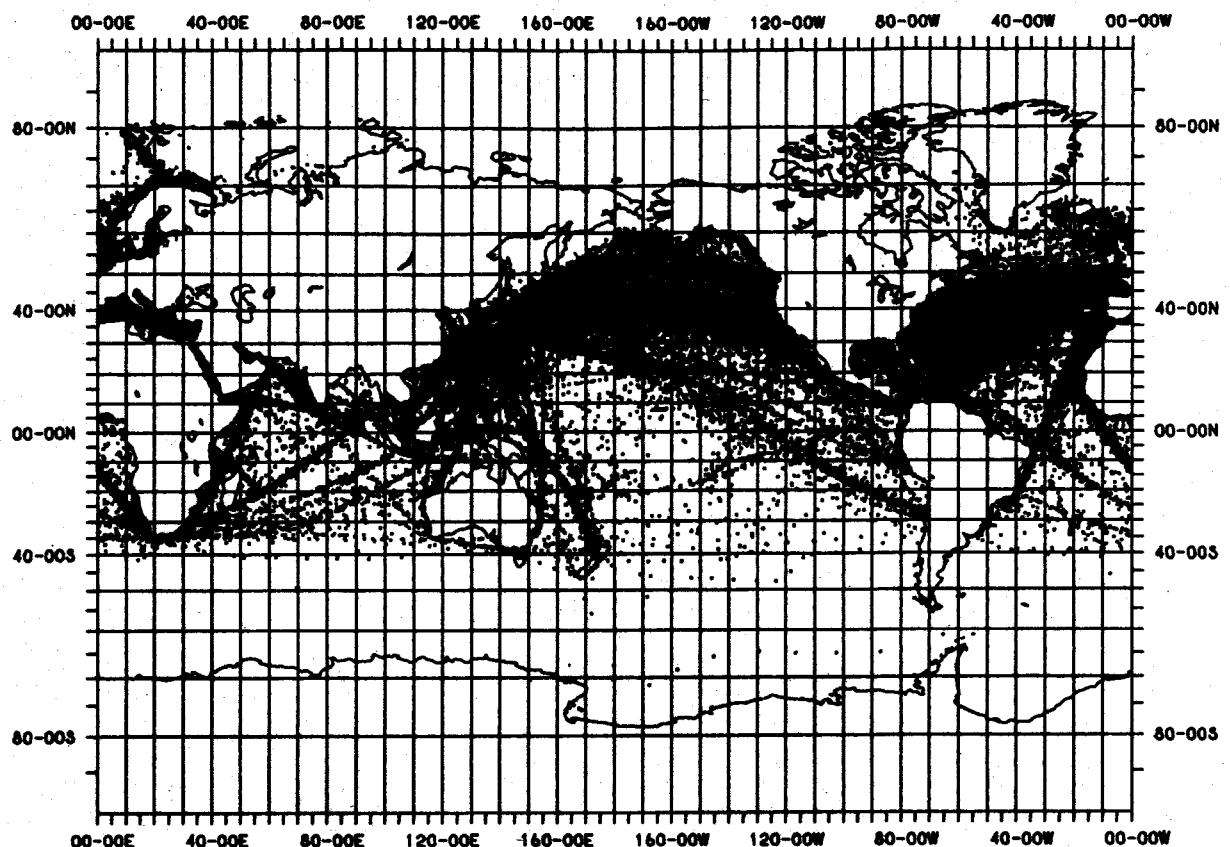

Fig. 7: The observation spots for tar ball data

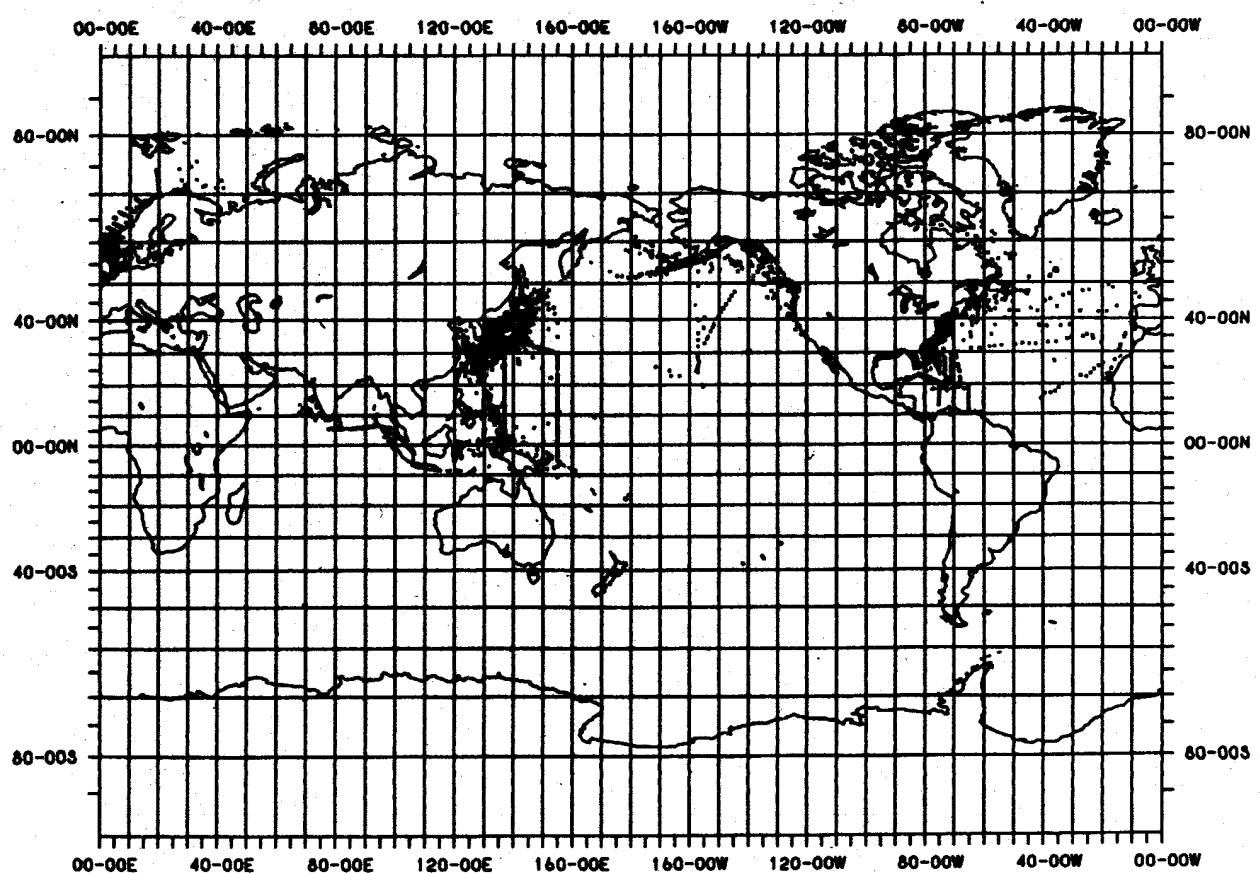

Fig. 8: The observation spots for beach tar data

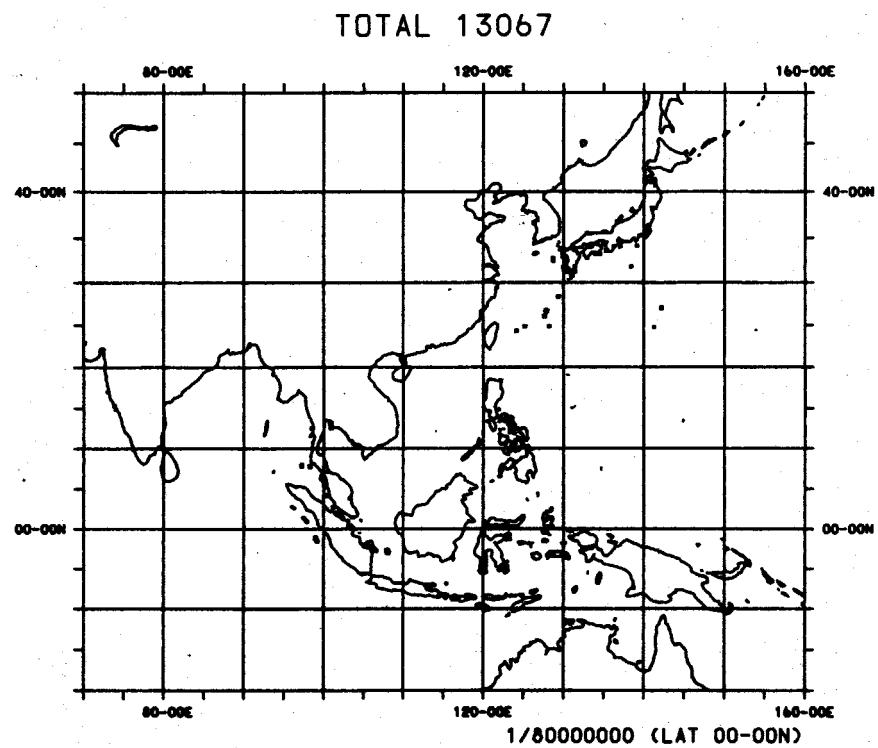

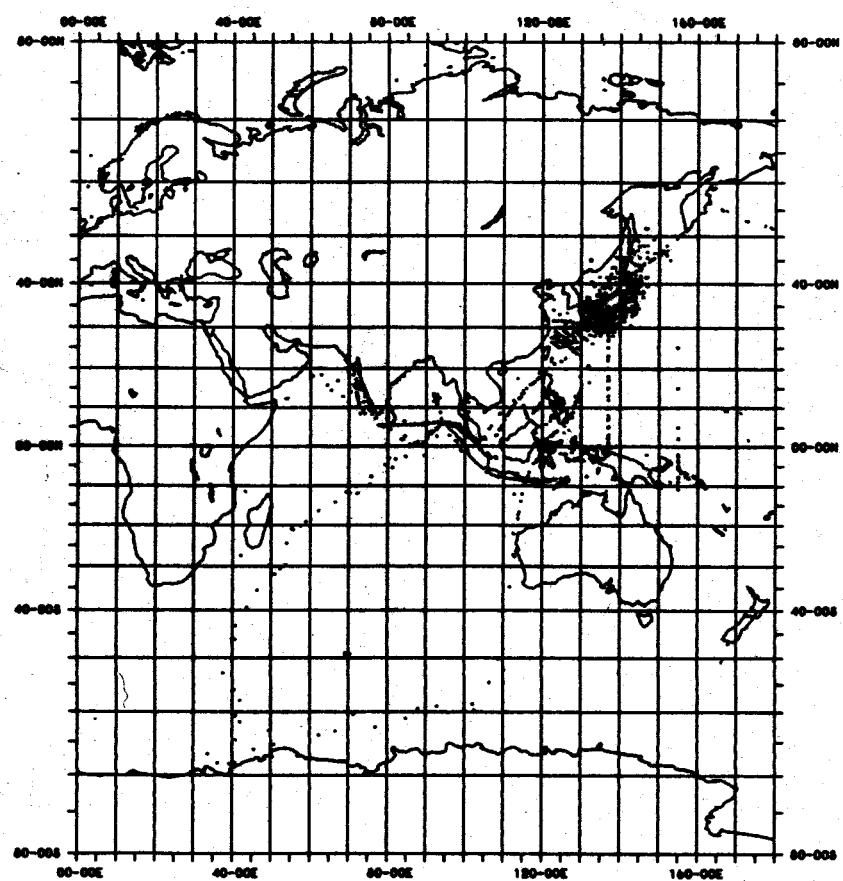

Fig. 9: The observation spots for hydrocarbon data

2.4 RNODC-ADCP (Acoustic Doppler Current Profiler)

2.4.1 Activities

Major activities are as follows: --

- (1) The collection and archive of data and development of the methodology of ADCP data management since 1991.
- (2) The operation of ADCP-DAC (Data Assembly Center) of WOCE (World Ocean Circulation Experiment) since 1995 on cooperated with Univ. of Hawaii.
- (3) The development and using of ADCP data management system on the data base of JODC.

2.4.2 Data holdings

Data holdings are shown by the following tables: --

- (1) Table 7: The number of archived data in 1997 by country.
- (2) Table 8: The inventory of data with provided by Univ. of Hawaii in 1997.

Table 7: ADCP Data received at JODC in 1997

Japan	:	437 Cruises
U.S.A	:	17 Cruises

Table 8: ADCP Inventories provided by Univ. of Hawaii in 1997
