OceanDocs >

OceanDocs

Research & Publications in Marine Science in digital form, including preprints, published articles, technical reports, working papers and more.

OceanDocs is supported by the **Intergovernmental Oceanographic Commission (IOC)** specifically to collect, preserve and facilitate access to all research output from members of their Ocean Data and Information Networks (ODINS). It is one of a number of complementary thematic digital marine and aquatic repositories including the **Aquatic Commons**, which is supported by the International Association of Aquatic and Marine Science Libraries and Information Centers (IAMSLIC). The records of both repositories are harvested by **Avano** which aggregates records from marine and aquatic repositories around the World.
