

Development of the New Web-GIS system for the Ocean Policy in Japan

Yo Iwabuchi, Director of JODC

International symposium for the integration of marine-
related data and information

8th 12 2011, Tokyo, Japan

Outline

- * JCG's role for the integration of Ocean Data and Information
 - * Navigational Chart
 - * Japan Oceanographic Data Center
 - * Coastal environmental information system
- * New web GIS system for the Ocean Policy in Japan

History of the Data Management by JHOD/JCG

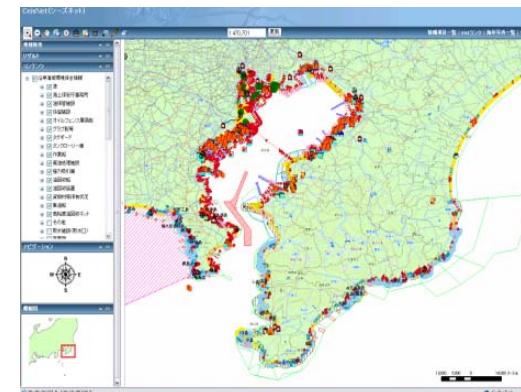

- * 1872
 - * Navigational Chart
- * 1965
 - * Japan Oceanographic Data Center
- * 1994
 - * Electronic Navigational Chart
- * 2002
 - * Coastal Environmental Information Service (Ceis Net)
for oil disaster prevention

Navigational Chart

ENC
(ECDIS)

Ceis Net

Navigational Chart

Land

Sea

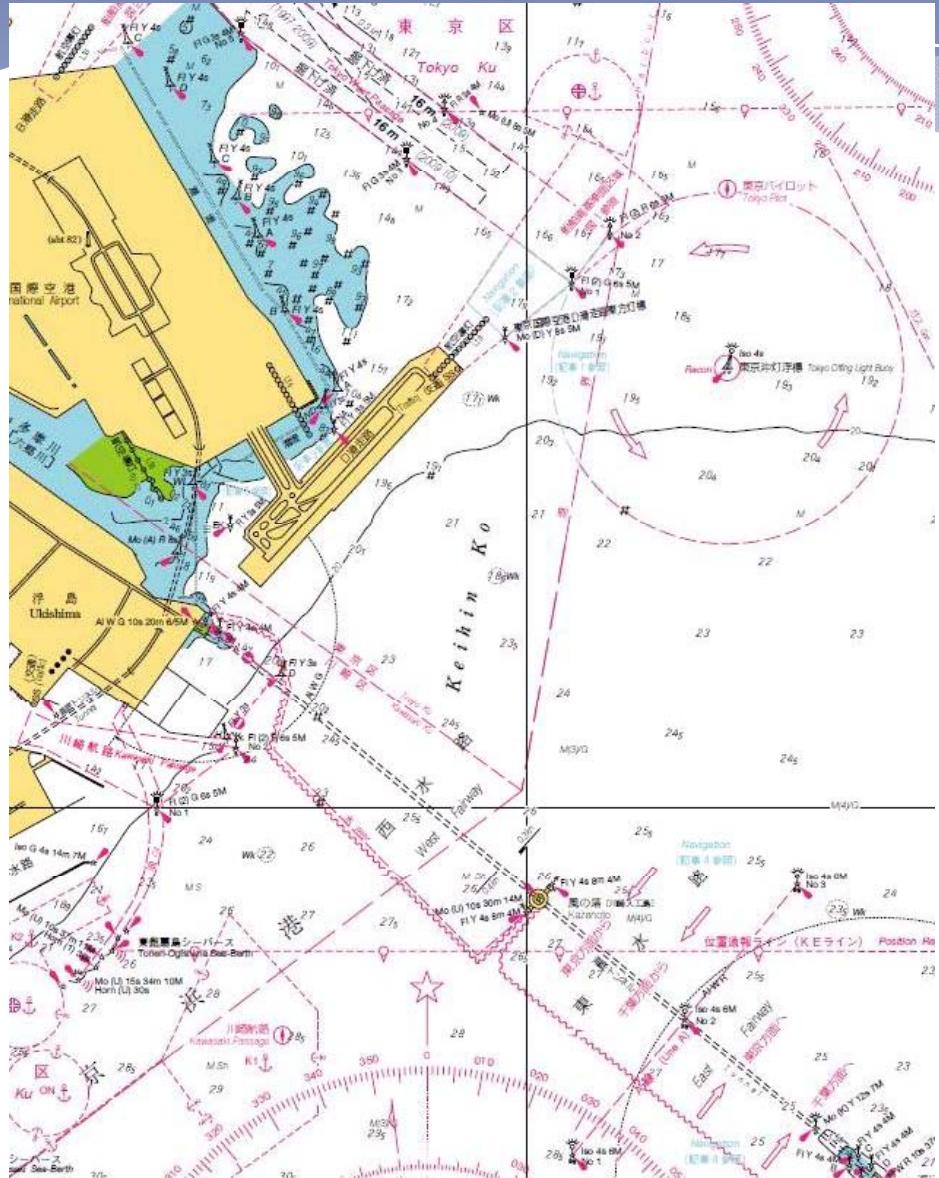

- * Landscape and landmarks are visible
- * Undersea features are invisible

Navigational Charts are
essential for the Navigation

Navigational Chart

- * Compiling the marine information for safety navigation
- * Water depth
- * Bottom quality
- * Positions of aid to navigation
- * Regulation of law and order
- * Landmarks

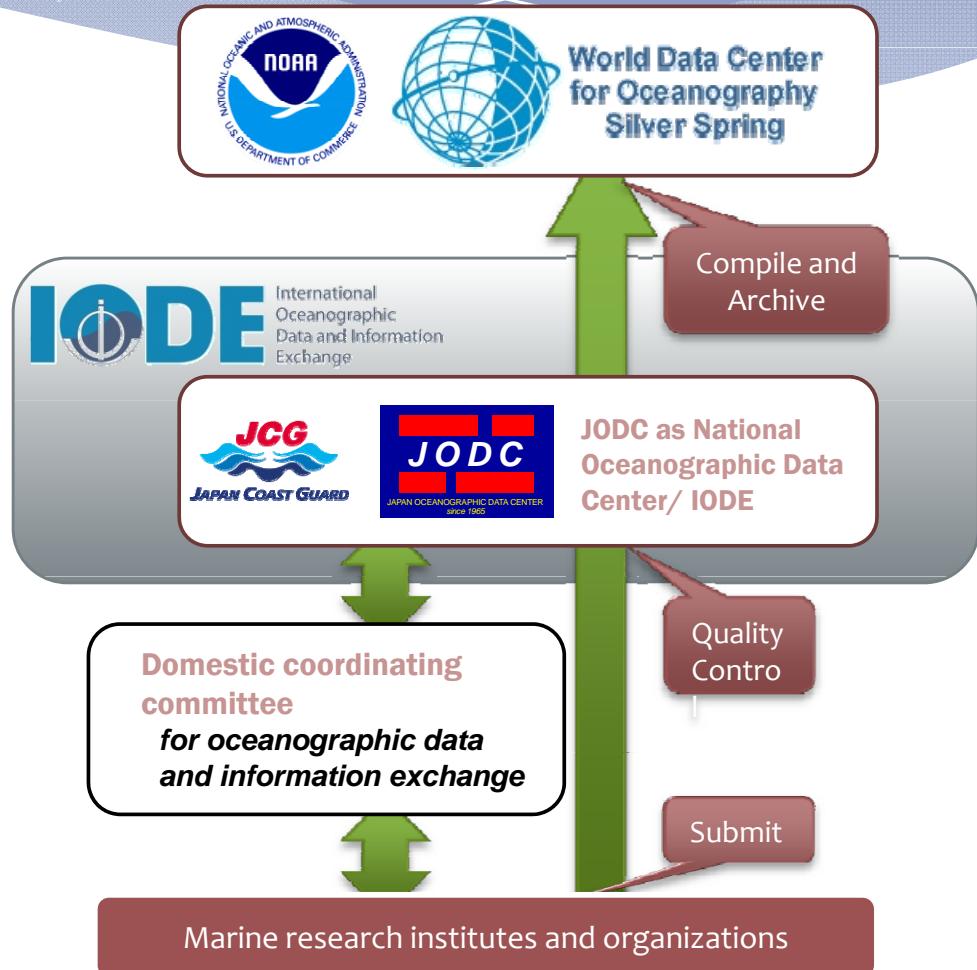

Japan Oceanographic Data Center: JODC

International Council for Science

- * The synthetic marine data bank of Japan
- * Under the framework of International Oceanographic Data and Information Exchange (IODE) promoted by UNESCO/IOC
- * Established in 1965

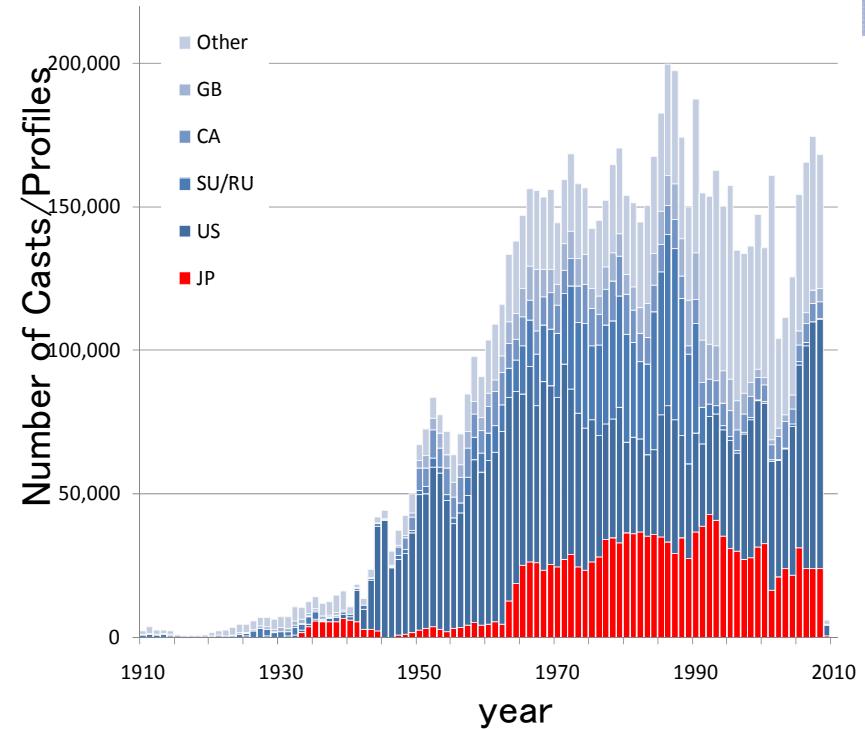

Data types and products on JODC

- Ocean Station Data
- Marine Organisms
- Ocean Current
- Tide (Sea Level)
- Tidal Current
- Marine Pollution
- Bathymetry and Marine Geophysics
- Oceanographic Information
 - Cruise Summary Report etc.
- Gridded Data Products
 - Temperature (1 Degree Mesh)
 - Salinity (1 Degree Mesh)
 - Ocean Current (1 Degree Mesh)
 - Depth (500m Mesh)

JODC

- * ~20 % contribution for the total of “World Ocean Database 09” by NODC/NOAA
- * Submitting 30,000 to 40,000 records every year through JODC since the establishment

Time series of the number of station data by Nationality (data source : WOD09)

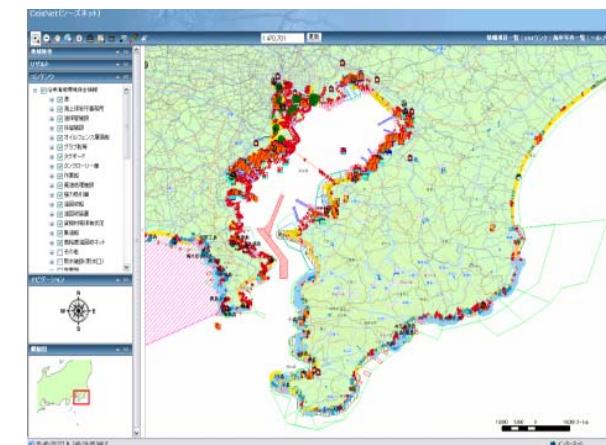

Coastal environmental Information system: CeisNet

- * 1990
 - * International Convention on Oil Pollution Preparedness, Response and Cooperation
- * 1997
 - * NAKHODKA oil spill incident
 - * ~6,240kl of heavy oil spilled
 - * DIAMOND GRACE oil spill incident
 - * ~1,550kl crude oil spilled

CeisNet

- * Requirements for the CeisNet
 - * To cover the various kind of environmental information
 - * Equipment for oil spill, environmental sensitivity of the coast, low regulations etc.
 - * To overlay and display required information
 - * To provide information as soon as possible

2002 Web-GIS service launched

Statistics of CeisNet

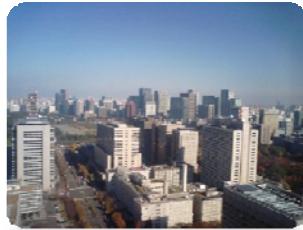

* GIS features from maps:	~60,000
* Fishery right areas	44,612
* Fishery port areas	2,940
* Seaweed beds	10,944
* Wetlands	2,389
* Marina	444
* Swimming beaches	1,396
* GIS features from docs:	~10,000
* Locations of equipment	2,898
* Vessels, tracks, etc.	4,630
* Mooring facilities	1,037
* Coastline length for ESI Info.	33,000 km

Web GIS service for JOP
(General/Multi Purpose)

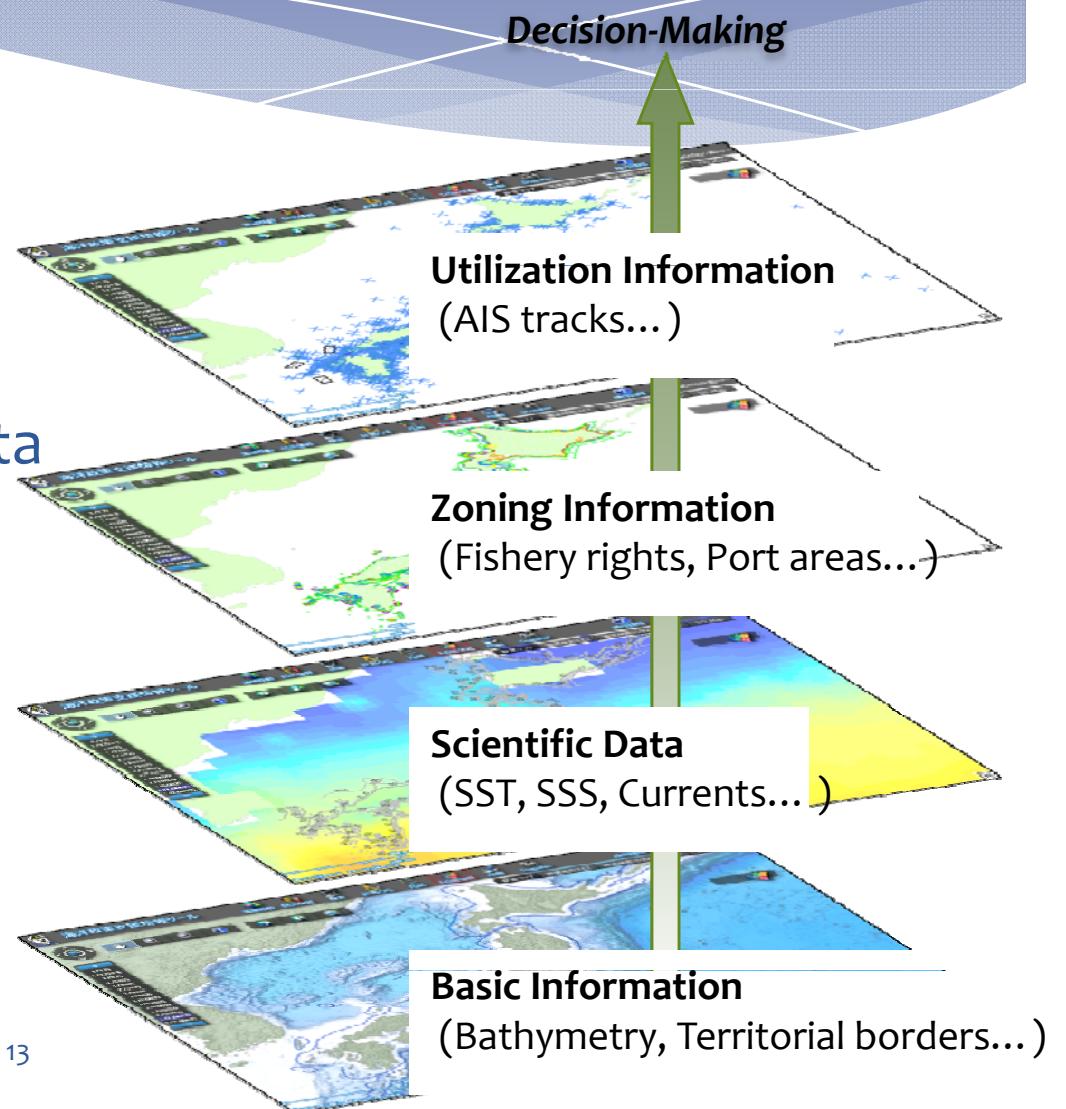

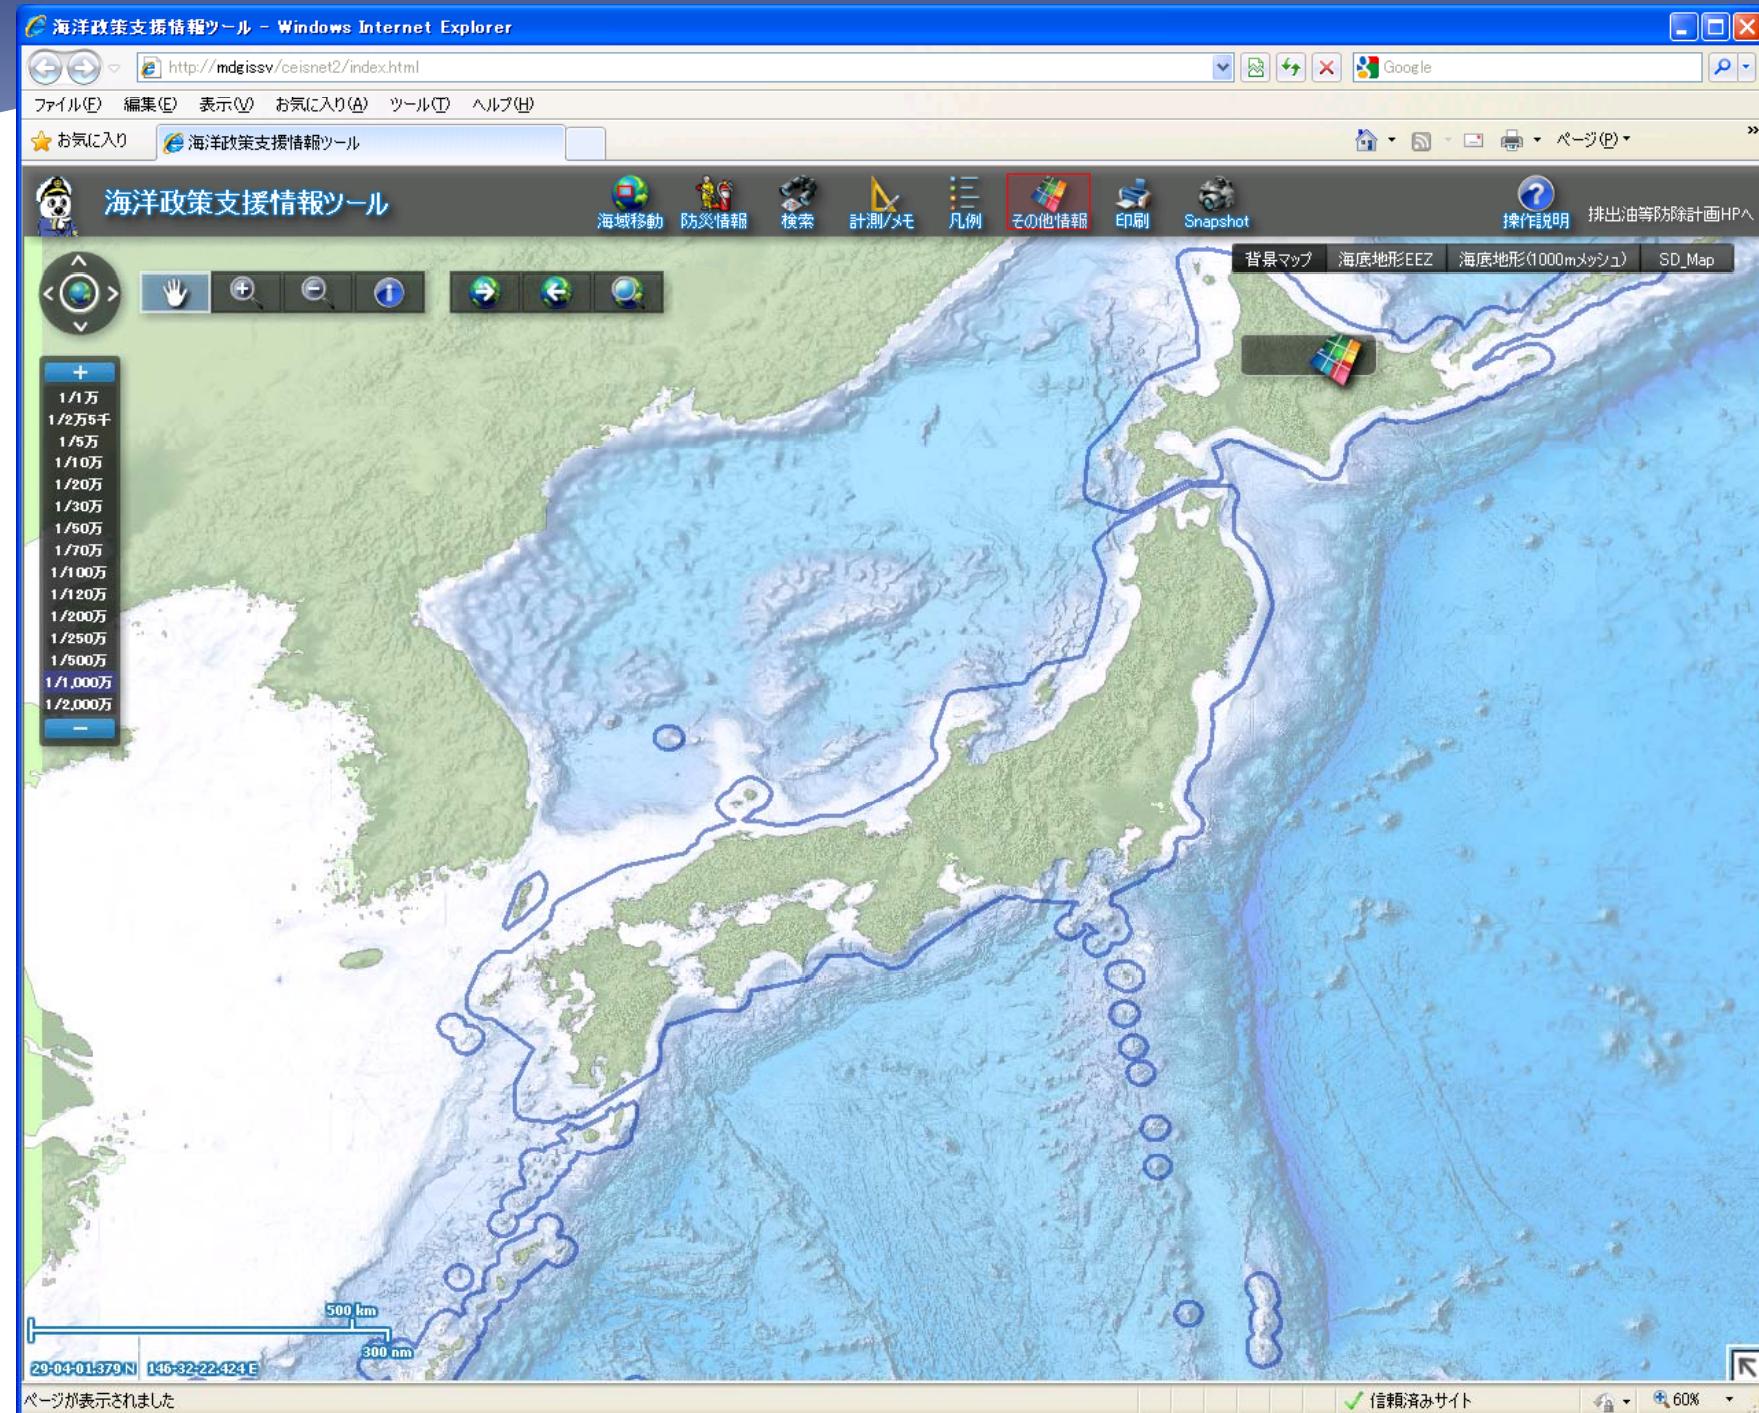

CeisNet
(Environmental Assessment)

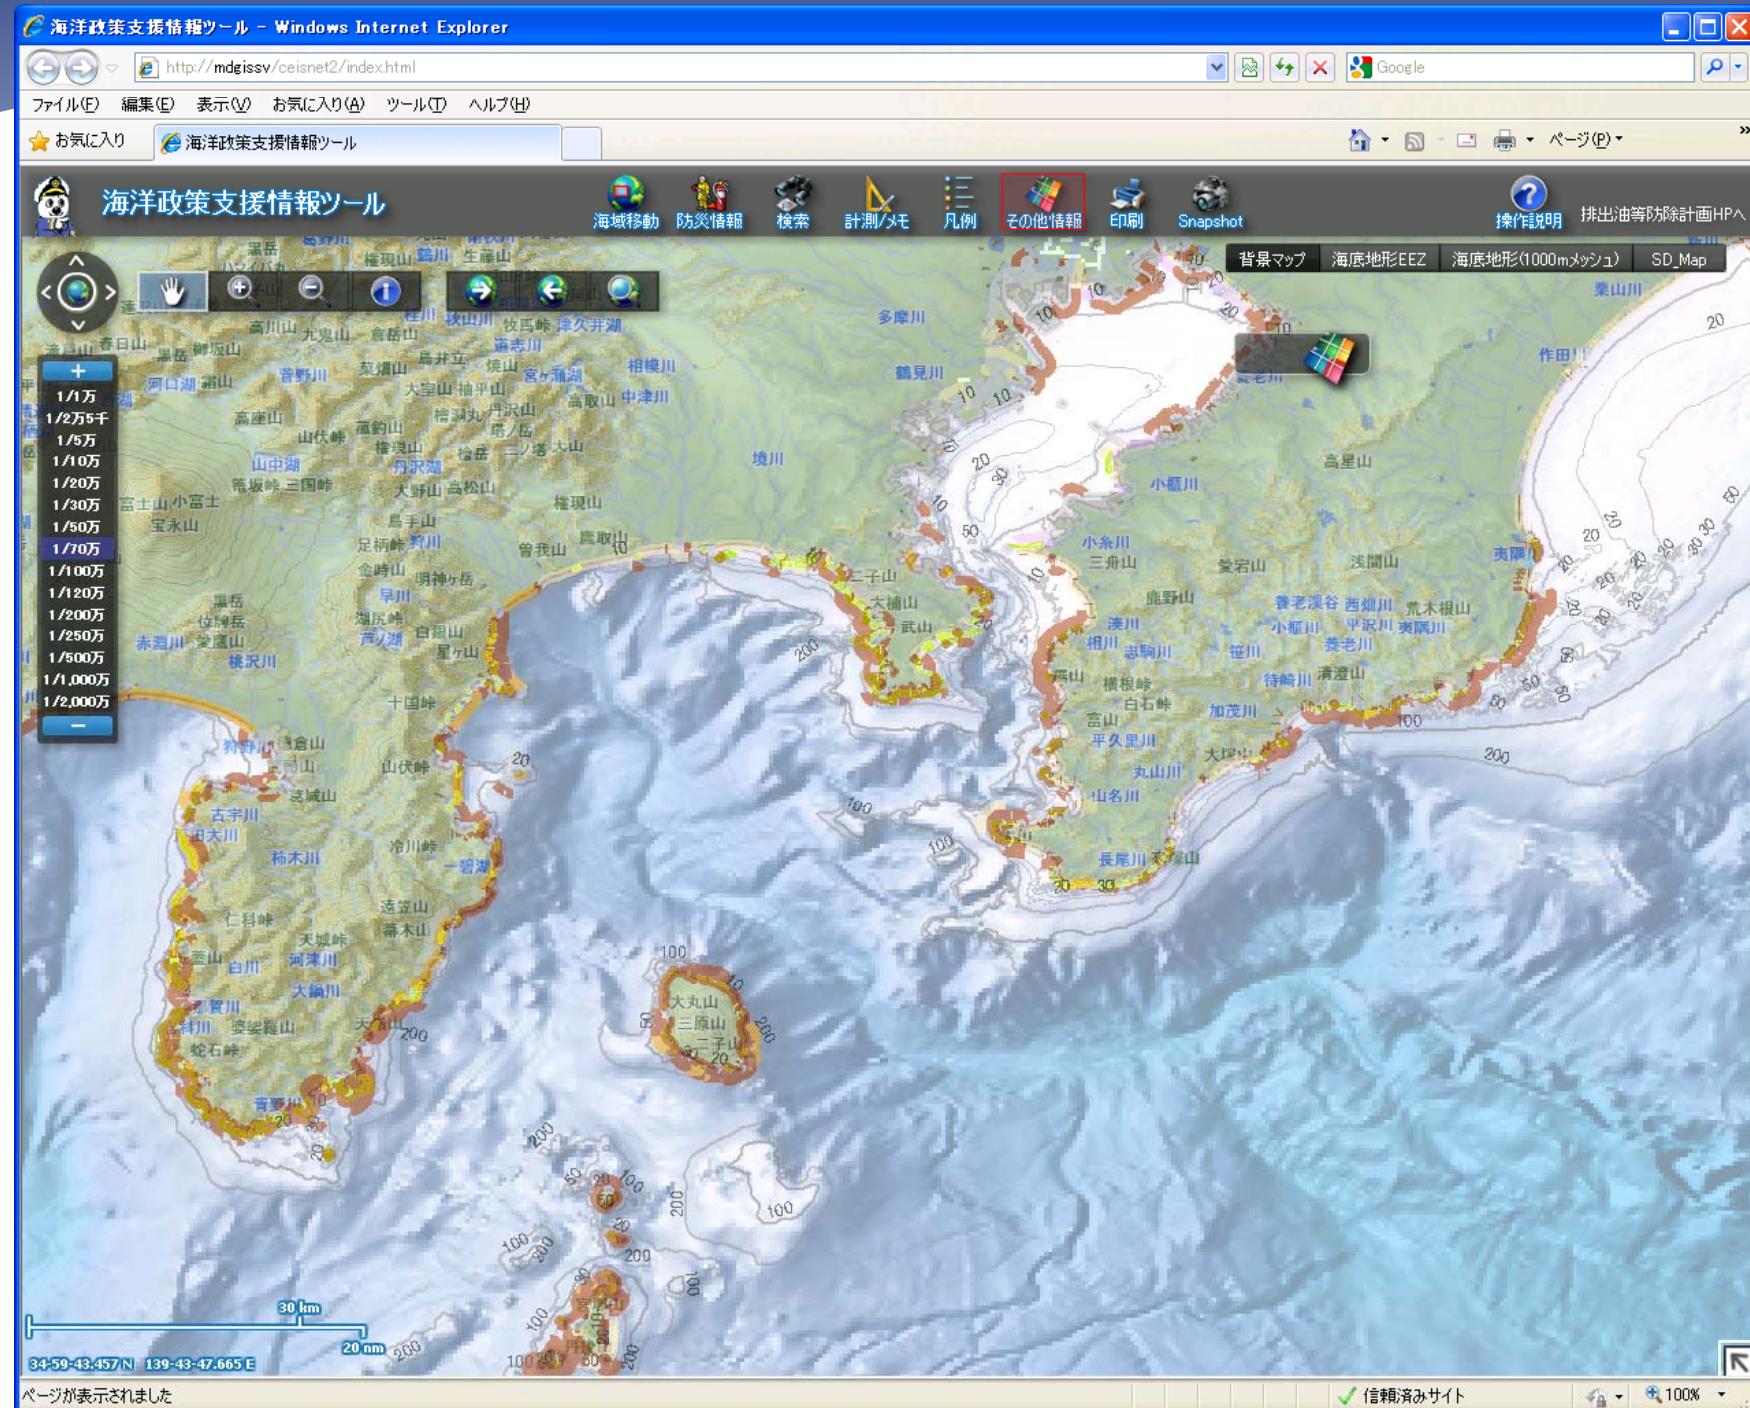

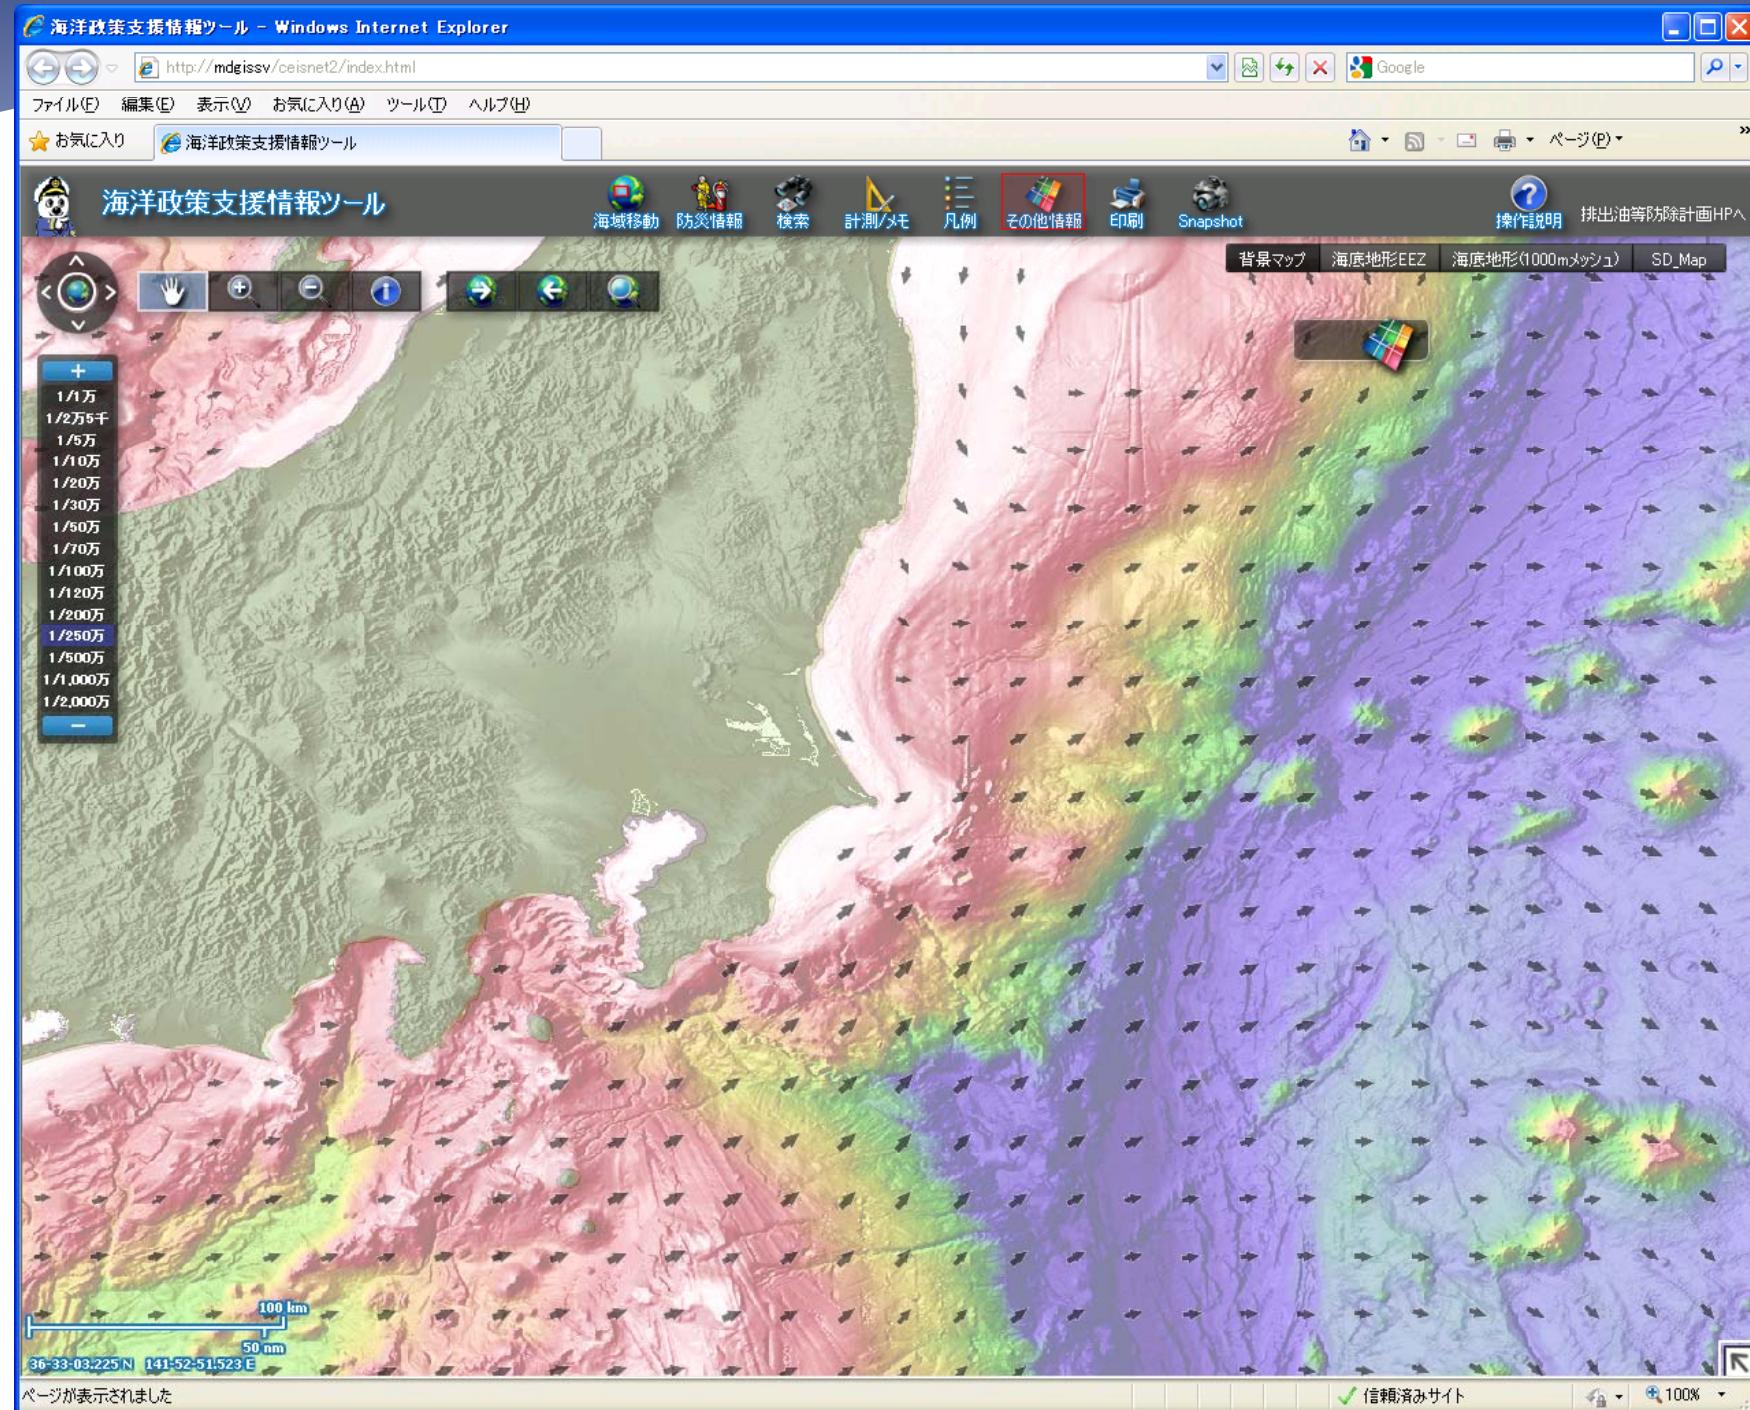

Web GIS service for the Japanese Ocean Policy

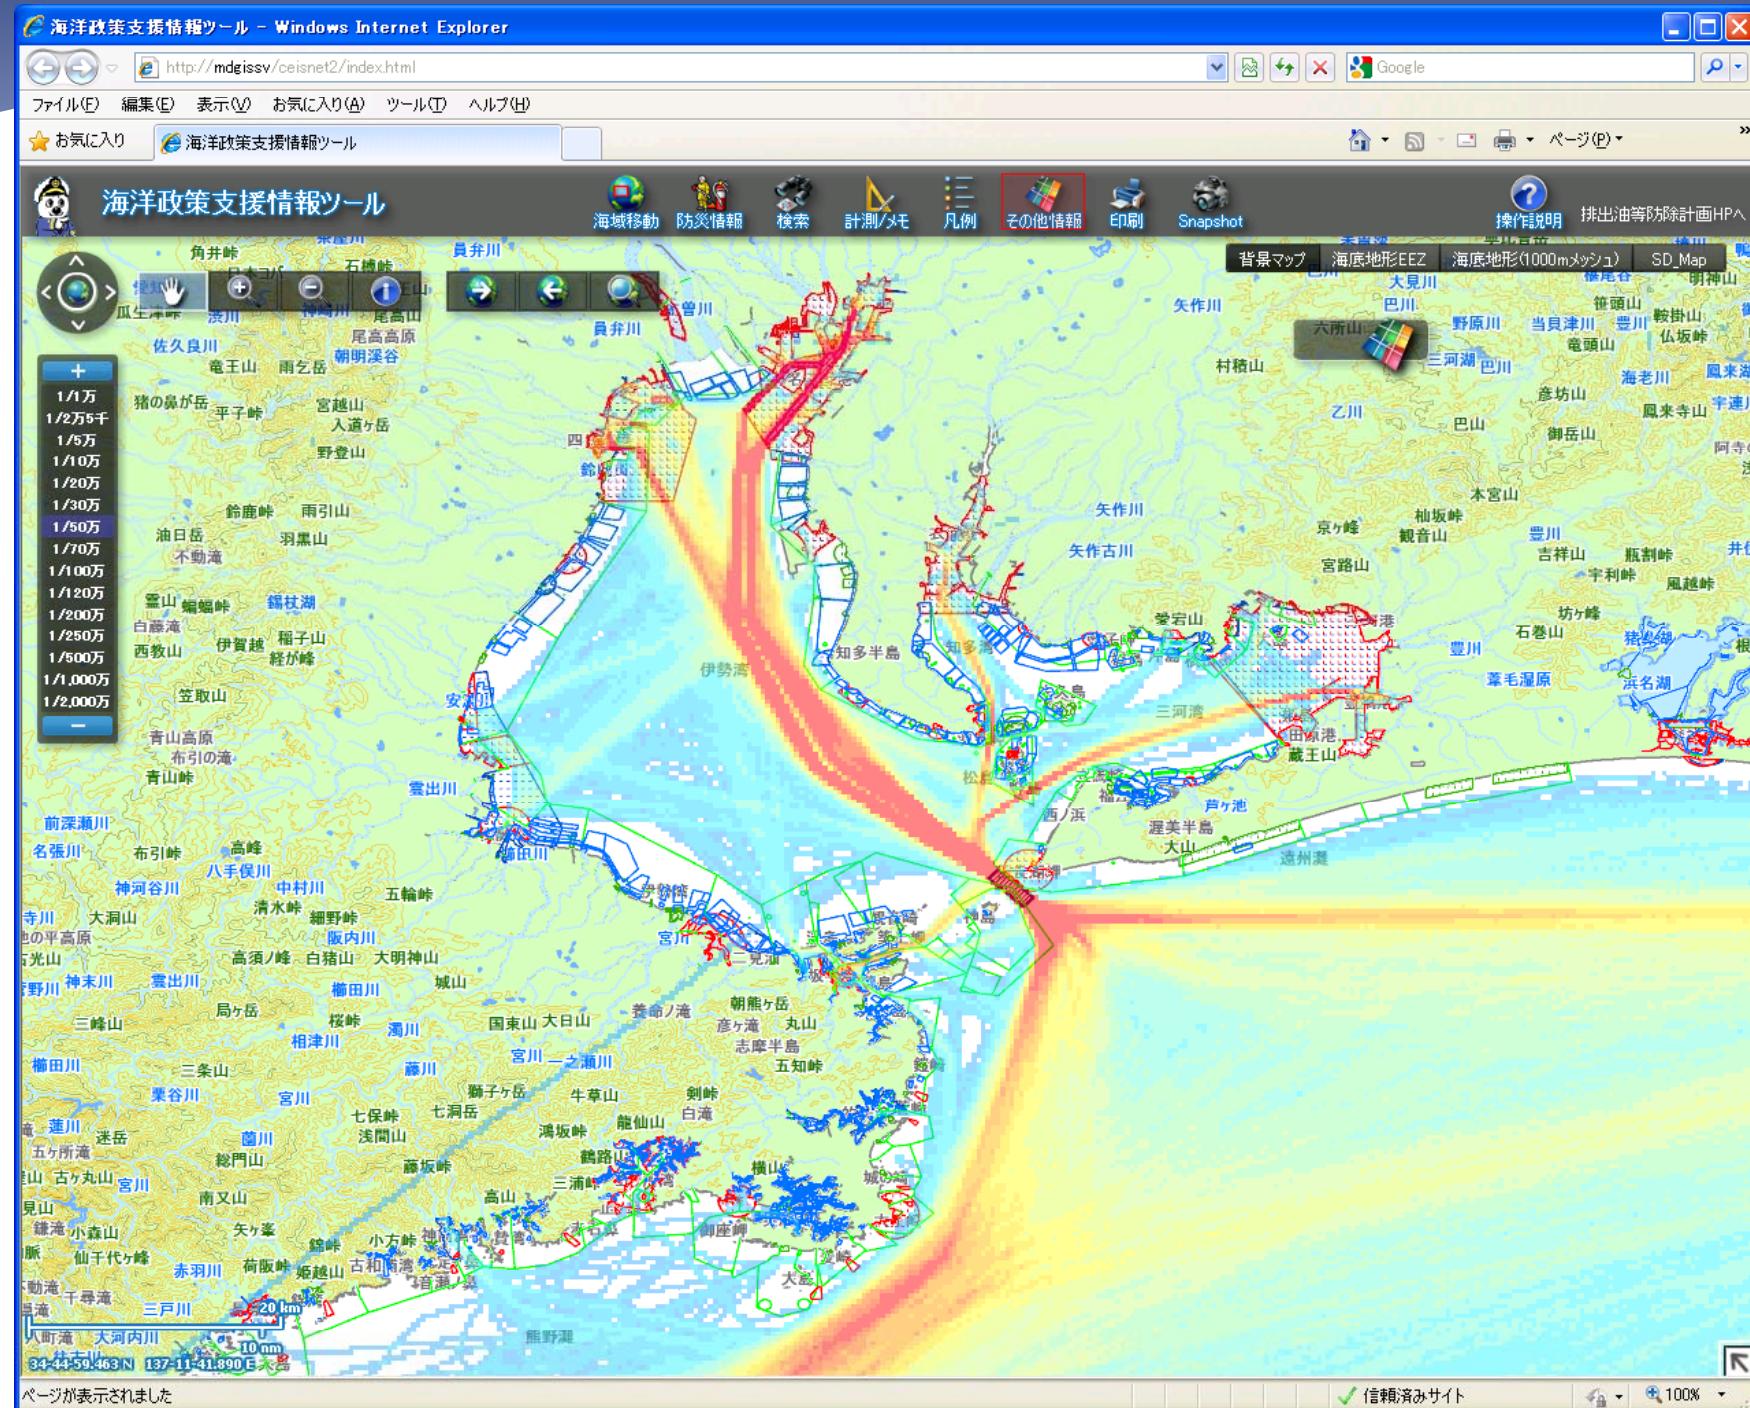

- * Concepts of the service
 - * To be open to the public
 - * To visualize the marine spatial information and data on the Web browser
 - * To cover the data and information existing in JODC/JCG

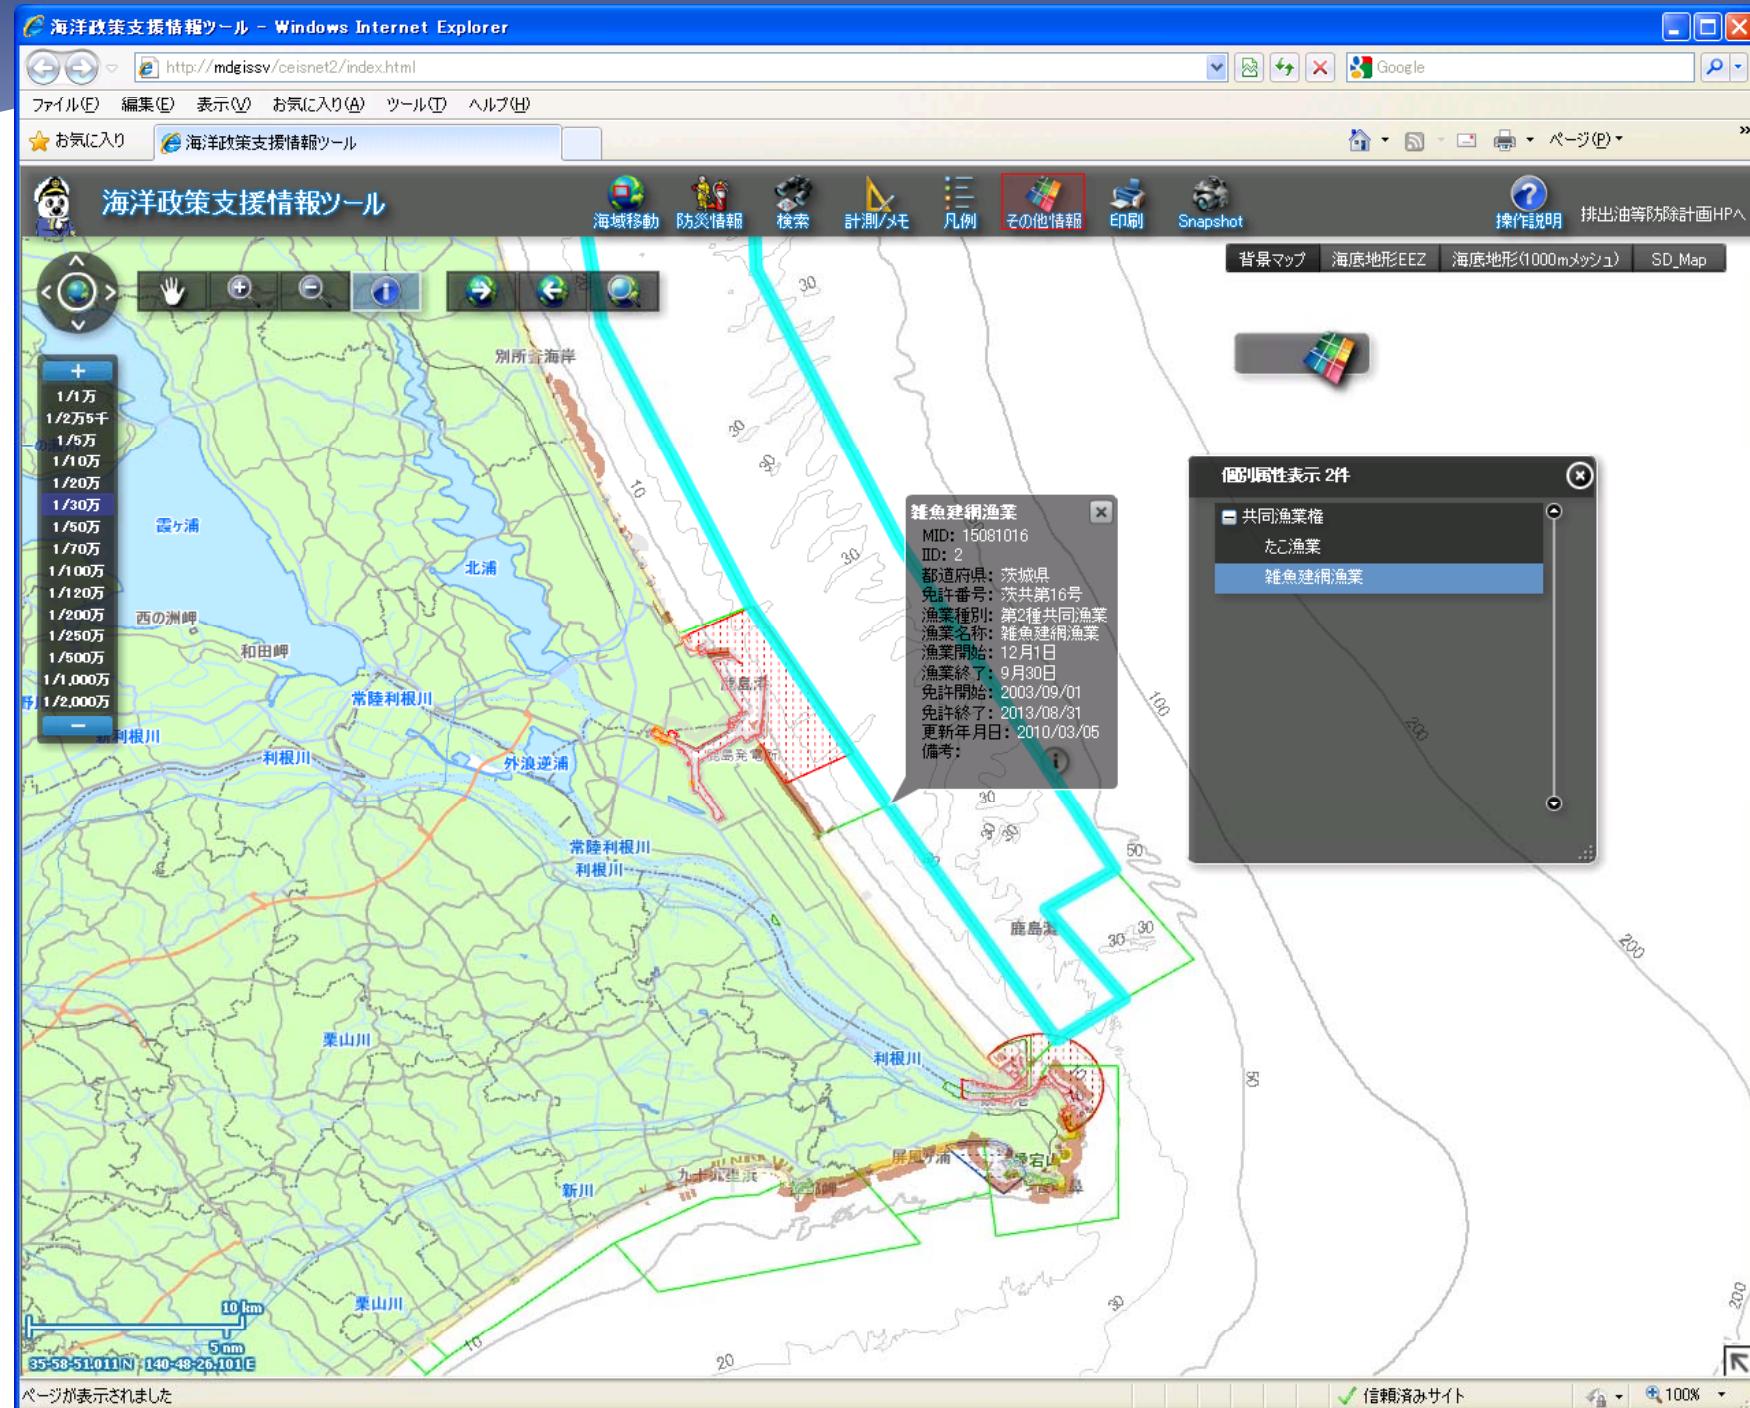

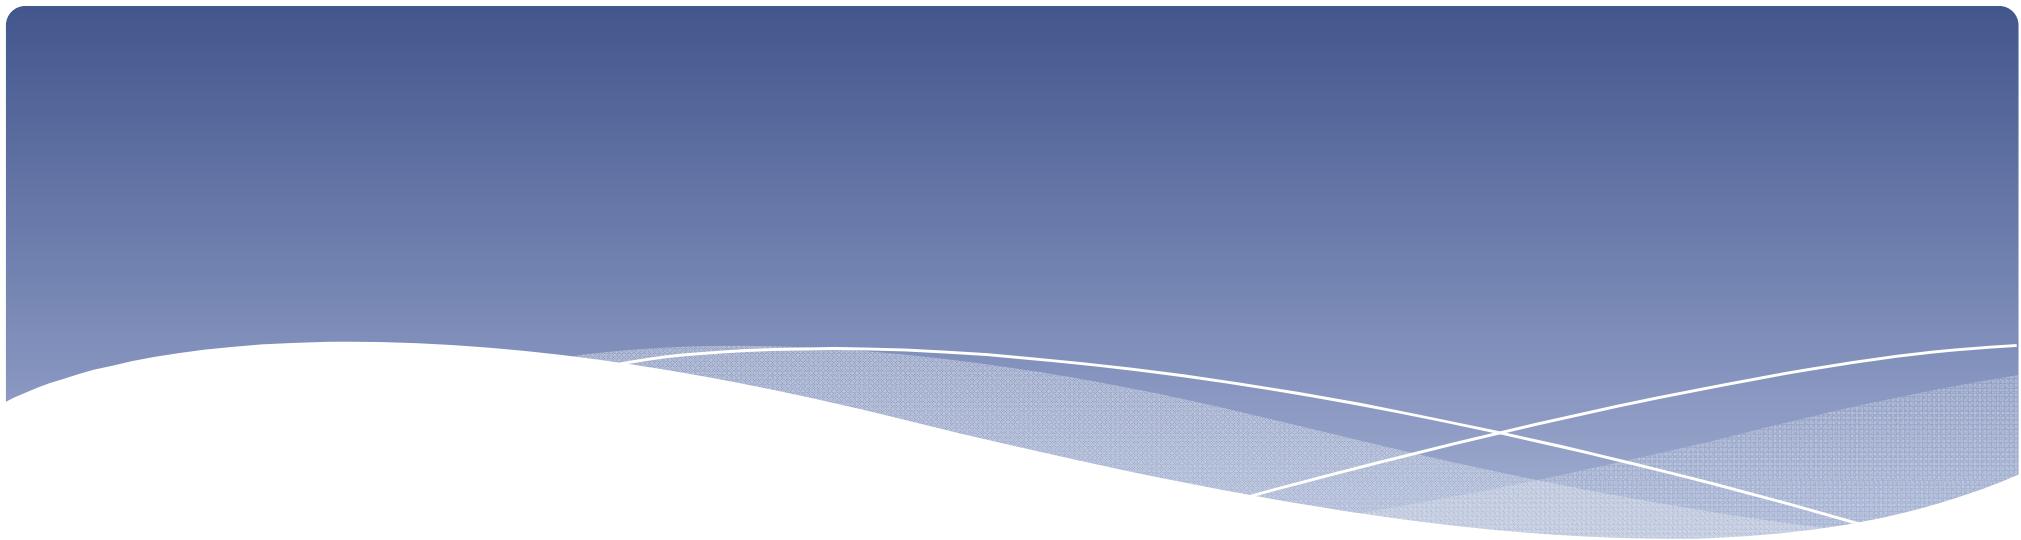

Summary

- * JCG's role for the integration of Ocean Data and Information
 - * As specialists in marine-related data and information, JCG/JODC will cooperate in compilation, management and distribution of marine-related information under the framework of Basic Plan on Ocean Policy in Japan.
 - * The new Web-GIS service will be launched by the end of FY2011.

Thank you

Integration of the Oceanographic Data and Information

- * Basic Plan on Ocean Policy
 - (approved in Cabinet meeting 18 March, 2008)
 - * 2.6.(3) Integration of marine-related information
 - * It is troublesome to search necessary information on specific marine zones or of specific types.
 - * Establish a system to comprehensively manage and provide the pieces of information now scattered in respective agencies.
 - * In the process, utilize the efforts made so far by agencies such as the Japan Oceanographic Data Center
- (abridged)
