

## Observation Instrument Code -Large classification

Update : 2018 12 July

| Code | Category                   | Name                          |
|------|----------------------------|-------------------------------|
| SD   | Serial                     | Serial Observation            |
| SS   | Serial                     | STD                           |
| SC   | Serial                     | CTD                           |
| SX   | Serial                     | XCTD                          |
| SA   | Serial                     | AXCTD                         |
| SB   | Serial                     | Bucket                        |
| BT   | Temperature                | BT                            |
| BX   | Temperature                | XBT                           |
| BD   | Temperature                | DBT                           |
| BA   | Temperature                | AXBT                          |
| BR   | Temperature                | RMT                           |
| BE   | Temperature                | Cooling Water                 |
| BY   | Temperature                | ART                           |
| IT   | Temperature, Salinity etc. | Intake                        |
| DB   | Temperature, Salinity      | Drift buoy                    |
| CU   | Current                    | GEK                           |
| CD   | Current                    | Drift                         |
| CA   | Current                    | ADCP                          |
| CV   | Current                    | Drift buoy                    |
| CM   | Current                    | Moored current meter          |
| MU   | Tidal current              | Ultrasonic current meter      |
| ME   | Tidal current              | Electromagnetic current meter |
| MS   | Tidal current              | Impellar current meter        |
| TF   | Tide                       | Float                         |
| TP   | Tide                       | Water Pressure                |
| WV   | Marine Meteorology         | Visual observation            |
| WT   | Marine Meteorology         | Ship-borne wavegauge          |
| WR   | Marine Meteorology         | Radar wavegauge               |
| WP   | Marine Meteorology         | Water pressure wavegauge      |
| WH   | Marine Meteorology         | Water height wavegauge        |
| GC   | Gas                        | pCO <sub>2</sub>              |
| ZZ   | Others                     | TOPEX/Poseidon etc            |
|      |                            |                               |
| 99   | unknown                    | Unknown instrument            |
