

Results of the IOC GODAR Project, 1993-2006

Sydney Levitus

Director, World Data Center for Oceanography, Silver Spring

We present the accomplishments of the IOC GODAR project since its' inception in 1993. The project has resulted in the addition of 3.5 million temperature profiles available without restriction to the international scientific community as well as the addition of many other data.

World Ocean Database 2005

Sydney Levitus

Director, World Data Center for Oceanography, Silver Spring

We describe the World Ocean Database 2005 (WOD05) which is the world's largest collection of ocean profile data available without restriction. WOD05 contains all data made available as part of the GODAR project. WOD05 is available on DVD as well as online at www.nodc.noaa.gov.
